PROFILE

Dedicated AWS DevOps enthusiast seeking a role to apply hands-on expertise in cloud infrastructure, automation, and CI/CD pipelines. Committed to optimizing systems and ensuring scalability while learning cutting-edge cloud technologies.

PROFESSIONAL EXPERIENCE

Aws Cloud & DevOps Intern

08/2024 – Present
Bengaluru, India

Genie Us Tech

- Deployed and managed EC2 instances, VPCs, and S3 buckets using CloudFormation and Terraform.
- Automated infrastructure with CI/CD pipelines using Jenkins and containerized applications with Docker and Kubernetes.
- Implemented cloud security best practices with IAM policies and optimized costs using monitoring tools.

AWS APAC Solutions Architecture Virtual Experience

01/2025 – 01/2025
Mumbai, India

Forage

- Designed a scalable hosting architecture using Elastic Beanstalk to address client growth and latency issues.
- Explained architecture and cost models to clients in simple terms.

EDUCATION

Bachelor's Of Engineering in Computer Science & Design

11/2022 – Present
Thane, India

University of Mumbai

- Pursuing core computer science subjects along with design thinking, UI/UX, and human-computer interaction.
- Built a strong foundation in software development, algorithms, and creative computing, enabling the ability to design user-centered digital solutions.

Diploma in Computer Engineering

08/2019 – 06/2022
Lonere, Raigad

Dr. Babasaheb Ambedkar Technological University

- Gained foundational knowledge in computer hardware, software, programming, networking, and database management.
- Developed problem-solving skills through hands-on labs and mini projects in languages like C, C++, Python, Os and Java.

SKILLS

Cloud Service Provide — Amazon Web Service | **Cloud & Tools** — AWS (EC2, S3, Lambda, VPC, Auto Scaling, ELB), • Docker, • Kubernetes, • Jenkins, • Terraform, • CloudFormation | **Scripting** — Python | **Operating System** — Windows • Linux

COURSES

Master's In Full stack Development with Aws

03/2024 – 03/2025

Itvedant Education Pvt. Ltd

Thane, India

- Designed and deployed full-stack web applications using HTML, CSS, JavaScript, Django, Python with AWS cloud infrastructure.
- Hosted frontend on Amazon S3 and backend on EC2 within a secure VPC, using RDS for database management. Implemented CI/CD pipelines with GitHub Actions and Docker, ensuring smooth and automated deployments.
- Followed cloud best practices with services like Route 53, ACM, IAM, CloudWatch, and Secrets Manager for security and monitoring.

PROJECTS

Launching a Web Server on Amazon EC2

Technologies: Amazon EC2

Configured an EC2 instance as a web server with Security Groups, Elastic IPs, and SSH access for a secure environment.

Static Website Hosting Using Amazon S3

Technologies: Amazon S3, AWS IAM, CloudFront

Hosted a static website on S3 with CloudFront CDN, ensuring low latency and secure access with IAM roles.

Auto Scaling Implementation

Technologies: AWS Auto Scaling, Elastic Load Balancer (ELB)

- Implemented Auto Scaling groups to dynamically adjust EC2 instances based on traffic, improving application scalability.
- Configured ELB to distribute traffic efficiently, ensuring high availability and performance.

Serverless Real-Time Chat Application Using AWS Lambda

Technologies: AWS Lambda, Amazon API Gateway

- Developed a serverless real-time chat application using Lambda functions triggered via API Gateway.
- Ensuring low-latency and scalable communication.

3-Tier-Web-Architecture

Technologies:-Amazon S3, Route 53, ACM, EC2 (with Auto Scaling & ELB), VPC, IAM Roles, NGINX, Amazon RDS (MySQL), CloudWatch

- Built a secure, scalable web app using frontend hosted on Amazon S3 (Route 53 + ACM) and backend on EC2 behind ELB in a VPC.
- Integrated Amazon RDS, IAM, CloudWatch, and Secrets Manager, with CI/CD pipelines automated via GitHub Actions.

CERTIFICATES

- | | | |
|--|--|--|
| • AWS - Well-Architect  | • AWS Knowledge - Cloud Essentials  | • APAC - Solutions Architecture Job Simulation  |
| • Aws Cloud Practitioner  | | |
